COMPUTER STUDIES
(THEORY)
Nov. 2018 - 2½ hours

- **Paper 1**

Name Index Number

Candidate's Signature Date

Instructions to candidates

- (a) Write your name and index number in the spaces provided above.
(b) Sign and write the date of examination in the spaces provided above.
(c) This paper consists of two sections; A and B.
(d) Answer all the questions in Section A.
(e) Answer question 16 and any other three questions from section B.
(f) All answers should be written in the spaces provided on the question paper.
(g) This paper consists of 16 printed pages.
(h) Do not remove any pages from this booklet.
(i) Candidates should check the question paper to ascertain that all the pages are printed as indicated and that no questions are missing.
(j) Candidates should answer the questions in English.

For Examiner's Use Only

Section	Question	Maximum Score	Candidate's Score
A	1-15	40	
B	16	15	
		15	
		15	
		15	
	Total Score		

SECTION A (40 marks)

Answer all questions in this section

1. State **two** reasons for the increased use of laptop computers in government offices. (2 marks)

The image shows a decorative banner. The word "SCHOOL" is written vertically in large, bold, green letters on the right side. The letters are slightly slanted. The background consists of several horizontal dotted lines of varying shades of grey, creating a layered effect. A vertical grey line runs down the center of the banner.

2. Computer network technicians prefer to use command-line based operating system when configuring networks. State **three** reasons for the preference. (3 marks)

3. State **three** measures that should be put in place in a computer laboratory to safeguard users' health. (3 marks)

The image shows a series of five horizontal dotted lines arranged in a grid pattern. The lines are evenly spaced and extend across the width of the frame. A large, semi-transparent watermark consisting of a stylized 'X' and a vertical bar is positioned in the upper right corner.

4. State **three** ways in which barcode readers may be used in schools. (3 marks)

.....
.....
.....
.....
.....
.....

5. State **three** advantage of flat panel monitors over cathode ray tube monitors as used in computers. (3 marks)

.....
.....
.....
.....
.....
.....

6. State **three** possible reasons for the extinction of daisy wheel printers in the market. (3 marks)

.....
.....
.....
.....
.....

7. State **three** ways in which an operating system secures a computer system.

827

8. A law firm prefers to use hard copy output over soft copy output when handling documents for legal matters. State **two** reasons for this preference. (2 marks)

A015

9. State the function of each of the following features in a word processor application.

(a) Thesaurus;

(1 mark)

- (a) Thesaurus;

(b) Comments.

(1 mark)

- 10.** With the aid of an example, explain the term *multi-level list* as used in word processing. (3 marks)

- 11.** Distinguish between real-time operating system and distributed operating system. (3 marks)

.....
.....
.....
.....
.....
.....
.....
.....
.....

12. Explain the function of *protect sheet* feature in a spreadsheet program. (2 marks)

13. State **four** computer-based careers introduced as a result of computerised data processing method at the airport.

(2)

.....

14. In a spreadsheet, the formula =If(A1>10, A1*77, A1*50) is entered in a cell. Interpret the results.

(3 marks)

.....

15. State a stage in systems development life cycle where each of the following activities are carried out:

(a) identifying the technologies that may be used in a proposed system;

(1 mark)

(b) identifying shortcomings of a system;

(1 mark)

(c) preparing the system migration plan.

(1 mark)

SECTION B (60 marks)

Answer question 16 and any other three questions from this section in the spaces provided.

- 16.** (a) With the aid of a flow chart, describe *a loop control structure* as used in programming. (4 marks)

- (b) Study the following pseudocode and answer the questions that follow.

1. Start
 2. Get value1 and value2
 3. If value1 > value2 Then
 4. Maximum = value1
 5. Else If value1 < value2 Then
 6. Maximum = value2
 8. Else Go to 9
 9. Display Maximum
 10. Stop

- (i) State the purpose of the pseudocode.

(1 mark)

A decorative graphic element at the top of the page. It features four horizontal dotted lines spaced evenly across the width of the page. In the center, there is a vertical grey bar that tapers towards the bottom. A thin diagonal grey line extends from the top of the central bar down to its midpoint.

(ii) Draw a flowchart equivalent to the pseudocode.

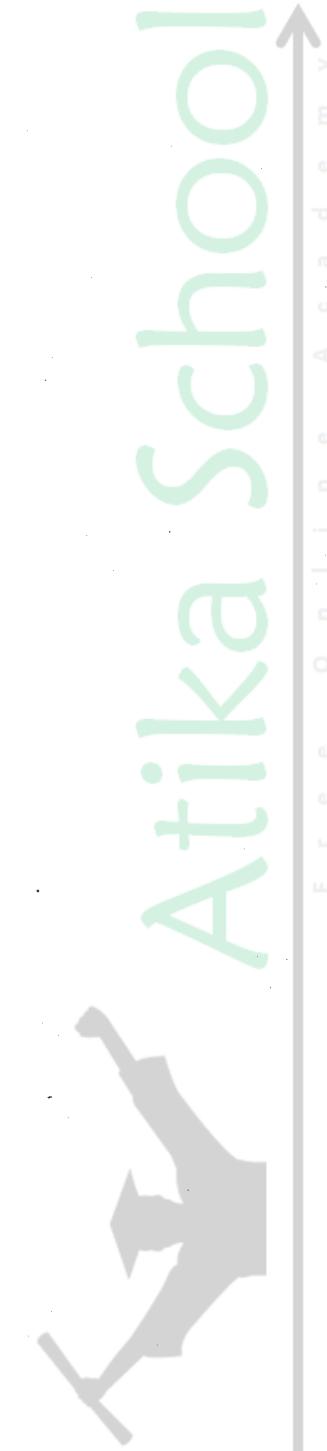

(6 marks)

827

A015

918282

- (c) Distinguish between a *source program* and a *compiler* as used in computer programming. (4 marks)

827

17. (a) (i) Explain the term *search engine* as used in the Internet. (2 marks)

A015

- (ii) Peter intends to download a movie from the Internet. State the **three** factors that may determine the total time taken to complete the download. (3 marks)

- (b) Wakulima online is an organisation that runs a web based system for assisting farmers to obtain market for their farm produce. State **four** technological reasons that may cause a farmer not to access the organisation's system. (4 m)

827

- (c) Explain a situation when each of the following Desktop Publishing program features may be used when creating a publication:

(i) cropping;

(2 marks)

(ii) transparency.

(2 marks)

- (d) List **two** areas where infrared waves are used in data communication.

(2 marks)

918282

18. (a) State **four** activities of the planning stage of systems development. (4 marks)

.....
.....
.....
.....
.....
.....
.....
.....

- 827
(b) Explain a circumstance when each of the following feasibility studies are carried out during systems development:

- (i) Technical; (2 marks)

.....
.....

- (ii) Economic; (2 marks)

.....
.....
.....

- (iii) Schedule. (2 marks)

.....
.....
.....

- (c) **Table 1** and **Table 2** are related tables in a database. Use them to answer the questions that follow.

Table 1

Dept Code	Dept Name
001	Computer
002	Aviation
003	Engineering

Table 2

DeptID	Student Registration No.	Student's Name
002	St01	Alex Toro
003	St02	Naomi Komi
002	St03	Peter Kengo

- (i) Identify the appropriate primary key for each table.

(1 mark)

.....
.....
.....

- (iii) Explain **two** benefits of enforcing referential integrity in the database. (4 marks)

.....
.....
.....
.....
.....
.....
.....
.....

19. (a) Describe each of the following validation checks as used in data processing:

- (i) Preserve check;

(2 marks)

.....
.....
.....
.....

- (c) Using 10 – bits binary number system, perform the following decimal operations in two's complement
(b)

$$129_{10} - 128_{10}$$

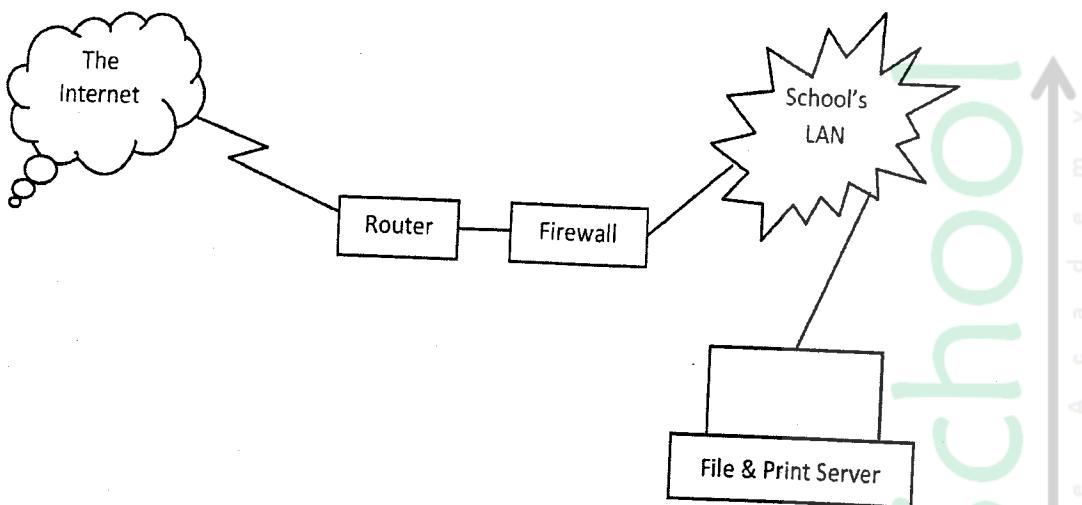

827

A015

918282

20. (a) The figure shows a network design. Use it to answer the questions that follow.

- (i) Explain the function of each of the following in the network.

I Router;

(2 marks)

.....
.....
.....
.....

II Firewall;

(2 marks)

.....
.....
.....
.....

III File server.

(2 marks)

.....
.....
.....
.....
.....
.....
.....
.....

- (ii) State two categories of software that must be installed in a computer so that users can use it to access the internet. (2 marks)

.....
.....

- (b) State **four** ways in which computers may be used to manage data in a research environment. (4 marks)

- (c) Some computer companies have opted to use the Internet to provide shared processing resources and online application services to users. State three advantages that this approach will have on their customers. (3 marks)

A large, faint watermark of a person running is visible across the page. The figure is shown from the side, wearing a cap and shorts, with one arm forward and one leg extended. The watermark is repeated in a staggered pattern across the horizontal space.

THIS IS THE LAST PRINTED PAGE.
