GATITU SECONDARY SCHOOL FORM 3 BIOLOGY PAPERS 2 END OF TERM 2 – 2016

- (a) Answer all the questions in SECTION A in the spaces provided.
- (b) In section B answer question 6 (Compulsory) in the spaces provided and either question 7 or 8 in the space provided after question 8.

SECTION A (40MKS)

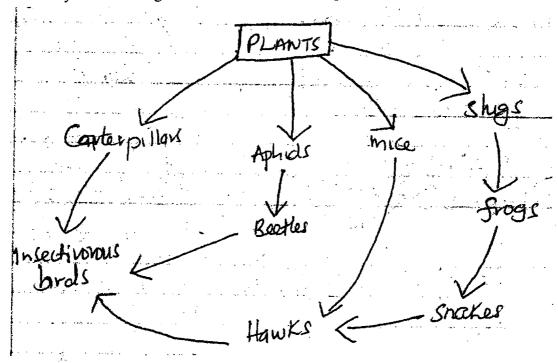

1. The two cells shown below are obtained from two different potato cylinders which were immersed in two different solutions P and Q.

- (a) (i) Name the structures labelled A and C (2mks)
 - Α
 - В
 - (ii) State the function of structure B. (1mk)
- (b) Suggest the identity of the solution Q (1mk)
- (c) Account for the change in Cell 1 above (2mks)

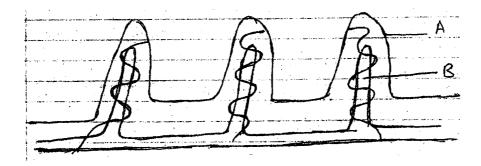

(d) State two importance of the physiological process being demonstrated above in living organisms. (2mks)

2. Study the following food web and answer the questions that follow.

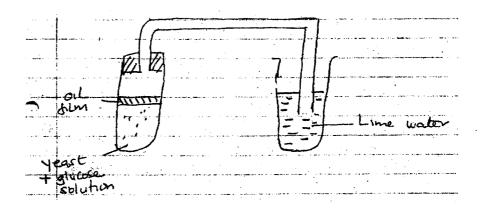

- (a) (i) Name the organisms that occupy the second trophic level (2mks)
 - (ii) What is the other name for the second trophic level (1mk)
- (b) Write down two food chains from the web that
 - (i) End with hawks as tertiary consumer (1mk)
 - (ii) End with hawks as Quaternary consumer. (1mk)
- (c) Giving reasons state;

- (i) The organism with largest biomass (1mk)
- (ii) The organism with least biomass (1mk)
- (d) Name the source of energy in the above ecosystem. (1mk)
- 3. The diagram below represents a longitudinal section through the ileum wall.

- (a) Identify the structure labeled A and B (2mks)
 - Α -
 - В
- (b) State one function of A and B (2mks)
 - Α
 - В
- (c) State two functions of the ileum. (2mks)
- (d) Explain the role of the liver in digestion. (2mks)

| | 4. The | e equation belov mmalian body. | w represents a metabolic | process that occurs in a certain organ in the | • |
|----|-------------------------|-----------------------------------|--|---|---|
| | | monia . | enzymes Carbon (IV) Oxide | Organic compound Q + water | |
| | (a)] | Name the proce | ss represented in the equ | nation. (1mk) | |
| | (b) N | Name the organ | in which the process occ | curs. (1mk) | |
| | (c) W | hy is the proce | ss important to the mam | mal? (1mk) | |
| | (d) Ide | entify the organ | ic compound Q. (1mk) | | |
| | (e) Wh | at happens to o | rganic compound Q?(1 | mk) | |
| | (f) A pe | erson was found Disease the j | l to pass large volume of person was suffering fro | f dilute urine frequently. Name the; (3mks) m. | • |
| | (ii) | Hormone tha | t was deficient. | | |
| | (iii) | The gland tha | t secretes the above horn | mone. | |
| 5. | Some gluc oil put on | cose was boiled top. The set up | and cooled in a boiling below was used. | tube. Some yeast was added and a layer of | |

- (a) Why was the glucose solution boiled before the experiment. (1mk)
- (b) What is the use of the oil film in the experiment? (1mk)
- (c) Name the process being investigated by the above experiment. (1mk)
- (d) State what happens to the lime water as the experiment proceeds to the end. (1mk)
- (e) Explain what would happen if the temperature of glucose and yeast was raised beyond 45°C. (2mks)
- (f) State two industrial applications of the process being investigated above in the experiment. (2mks)

SECTION B (40MKS)

Question 6 (Compulsory) and either question 7 or 8.

6. In an ecological study, a locust population and that of crows was estimated in a grassland area over a period of one year. The results were tabulated as shown below:-

| Months | J | F | M | Ι Δ | 11/ | T = | T | т. — | т | | | |
|------------------------|----|----|----|-----|-----------------|-----|-----|------|----|-----|-----|-----|
| Number of | 90 | 20 | | A | $\frac{M}{200}$ | J | 11_ | A | S | О | N | D |
| locusts | 30 | 20 | 11 | 25 | 200 | 450 | 652 | 15 | 10 | 35 | 192 | 456 |
| Number of crows(birds) | 4 | 2 | 0 | 1 | 8 | 16 | 22 | 2 | 1 | 1 | 5 | 15 |
| Amount of rainfall | 20 | 0 | 55 | 350 | 520 | 400 | 350 | 10 | 25 | 190 | 256 | 350 |

- (a) Draw a graph of population of locusts and crows (birds) against time. (8mks)
- (b) (i) State the relationship between rainfall and locust population. (1mk)
 - (ii) Account for the relationship you have stated in (b) (i) above (1mk)
- (c) What happens on the populations of locusts and crows in the months of January to March? Give a reason. 2mks)
- (d) State one method used to estimate the population of locust. (1mk)
- (e) (i) State the trophic level of the;

(2mks)

Locusts

Crows

| | (ii) | Construct a simple complete food chain involving these organisms (2mk | (s). |
|----|---------------------------|--|---------|
| | | | |
| | | • | |
| | (f) If th | he locusts were removed from the food chain, what would be its effect? (| lmk) |
| | (a) Dof | | |
| | | ine the following terms (2mks) iomass | |
| | (ii)Ec | cosystem | |
| | | | |
| 7. | Describe l in the regi | how hydrophytes and xerophytes are adapted to deal with environmental joins where they grow. (20mks) | problei |

8. Describe how the mammalian skin regulates body temperature.(20mks)
