### 4.13.1 Home Science Paper 1 (441/1)

## SECTION A: 40 MARKS

1. Functions of proteins in the body are:

- for the growth and repair of damaged tissues.
- is a major component of body muscle, brain, haemoglobin, hormones, antibodies.
- provides heat and energy when carbohydrates are absent or insufficient.
- prevents kwashiorkor.

Any $2 \times 1=2$ marks
2. Advantages of using a wooden spoon for cooking.

Does not;

- scratch cooking utensils.
- make noise while stirring.
- conduct heat.
- rust.
- bend while in use.

Any $4 \times \frac{1}{2}=2$ marks
3. Reasons for blanching vegetables.

- stops the action of enzymes.
- kills bacteria.
- retains nutrients.
- retains colour.
- reduces bulk.

Any $4 \times \frac{1}{2}=2$ marks
4. Ways of minimizing fatigue while working in the kitchen.

- Using a trolley/tray to carry dishes/ingredients.
- Using a hatch between the dinning room and the kitchen.
- Using the correct equipment for the task being done.
- Placing ingredients and utensils within reach.
- Using surface of comfortable height.
- Using labour saving equipment.
- Using a time plan.
- Working in a well lit area.
- Dovetailling.

Any $4 \times \frac{1}{2}=2$ marks
5. Distinguish between garnishing and decoration.

- Garnishing is adding colourful raw or cooked food items to a savoury dish to make it look attractive and appetising while decorating is adding raw or cooked food items to a sweet dish to make it look attractive and appetising.

Well differentiat
6. Definition of ventilation

- A process of introducing fresh air into a room and getting rid of stale air from the room.

1 mark
7. Advantages of using gas as a fuel in the home.

It is;

- Clean in use.
- Relatively cheap.
- Convenient to use.
- Easy to control/regulate.
- Portable.

Any $3 \times 1=3$ marks
8. Disadvantages of concealed drainage system.

- Expensive to install.
- Most suitable where there is piped water.
- Needs experts to unblock therefore expensive to repair.

Any $2 \times 1=2$ marks
9. Sources of consumer information.

- Mass media.
- Manufacturers.
- Consumers.
- Government bodies.
- Internet.
- Exhibition/trade fairs.

Any $2 \times \frac{1}{2}=1$ mark
10. Meaning of counterfeit.

It is an imitation of what is a genuine item (1) with an intention to deceive/defraud.(1)
2 marks
11. Vaccines a child should be given by age of nine months.

- BCG( Bacillus Calmette Guerrin )
- OPV ( Oral Polio Vaccine )
- DPT ( Diptheria, Pertusis/whooping cough, Tetanus )
- Hepatitis B, haemophillus Influenza Type B
- Pneumococcal vaccine (PCV10)
- Measles
- Yellow fever
- Vitamin A

12. Uses of the following items in first aid
(i) Safety pin

- removing foreign object arising from injury
- securing bandages
- piercing

Any $2 \mathrm{x} \frac{1}{2}=1$ mark
(ii) Cotton swabs

- controlling bleeding
- cleaning a wound
- applying ointment

Any $2 \mathrm{x} \frac{1}{2}=1$ mark
13. Points on the care given to a child with fever at home.

- Dress with light clothes.
- Give plenty of fluids.
- Sponge with a cloth wrung out of warm water.
- Give medication to lower the fever.

Any $3 \times 1=3$ marks
14. Points to consider when sorting clothes for washing.

According to ;

- Use/purpose.
- Colour.
- Degree of soiling.
- Age.
- Type of fabric.
- State of health.

15. Points to observe when hanging clothes in the wardrobe.

- Fasten the garment to retain shape and avoid slipping off / secure skirts and garments with wide necklines on hooks on the hangers with tapes.
- Hang garments straight.
- Hang each garment on its own hanger.
- Hang similar clothes together for neatness and easy retrieval.

Any $2 \times 1=2$ marks
16. Factors that determine the width of a hem on a garment.

- Shape of the edge.
- Weight of the fabric.
- Style/ design

17. Reasons for using machine fell seam on children's garments.

It is;

- Strong.
- Flat.
- Comfortable to the wearer.
- Decorative.

18. Uses of interfacing in garment construction.

- Stiffening to add firmness.
- Preventing stretching or sagging.
- Giving body or shape.
- Increasing crease resistance.
- Giving a crisp tailored look to the area where applied
- Obtaining a good knife edge.

19. Differentiate between a fibre and a fabric.

- A fibre is a hairlike unit of raw material from which cloths are made while a fabric is a cloth that is woven or knitted from a yarn/thread.

20. Pattern symbols
(a) $\downarrow \downarrow$
place on fold of fabric
1 mark
(b)

Single notch/balance mark

## SECTION B (20 marks)

21. (a) Factors to consider when setting a table for invited guests.

- The number of guests.
- The number of courses.
- The cutlery and crockery required.
- The menu.
- The occasion
(b) Procedure to follow when arranging flowers for the party.
- Ensure the flowers are fresh (not withered).
- Take the wire mesh or pin holder and place in the flower vase.
- Fill the vase three quarter full of water. (1)
- First $\left(\frac{1}{2}\right.$ place the tallest stem $\frac{1}{2}$ of foliage and then fill in with
depending on the desired shape. $\left(\frac{1}{2}\right)$
- Avoid using a lot of short stemmed flowers tucked in around the rim 1
- Check if the flower arrangement is in order. (1)
- Adjust appropriately. 1
- Avoid overcrowding the flowers. (1)
(c) Procedure of cleaning a canvas bag.
- Collect equipment and materials $\frac{1}{2}$
- Empty the bag $\frac{1}{2}$.
- Shake $\frac{1}{2}$ to remove loose dirt.
- Soak in cold water. $\frac{1}{2}$
- Wash in warm $\frac{1}{2}$ soapy water, $\frac{1}{2}$ scrub, $\frac{1}{2}$ using a soft $\left(\frac{1}{2}\right)$ brush / maize cob, use circular movement.
- Rinse $\frac{1}{2}$ in warm $\frac{1}{2}$ water, final rinse $\frac{1}{2}$ in cold $\frac{1}{2}$ water.
- Shake $\frac{-}{2}$ to remove excess water and to straighten the fibre.
- Dry $\frac{1}{2}$ on a cloth line.
- Store $\frac{1}{2}$.

## SECTION C: 40 MARKS

22. (a) Details found on bread wrapping.

- Weight.
- Manufacturer.
- Ingredients.
- Best before date / sell by date/expiry date.
- Contacts of manufacturer.
- Conditions for storage.
- Brand name.
- Quality assurance mark.
(b) (i) Advantages of budgeting the family income:
- Acts as a guide to wise buying / helps to avoid impulse buying.
- Assists planning / provides a basis for analysing the needs of the family.
- Gives room for saving.
- Assists family to live within their means.
- Enables the family to give priority to essential items.
- Gives psychological satisfaction.
(ii) Problems faced by consumers in Kenya today.
- Lack of money / low financial ability - many consumers may not afford basic needs due to lack of money.
- Counterfeit goods - some goods in the market are not original therefore low quality.
- Inflation - leads to price increase therefore consumers spend more on less.
- Lack of information - consumer lacking information concerning available goods and services.
- Lack of awareness of consumer rights - many consumers do not know their rights, thus leading to exploitation.
- Scarcity of goods/services eg. have money but no goods available.
$2 \times 2=4$ marks
(c) (i) Principles of food preservation.
- Application of heat.
- Removal of water / moisture / dehydration.
- Exclusion of air / oxygen.
- Reduction of temperature.
- Application of preservatives / chemicals.

Any $2 \times 1=2$ marks
(ii) Disadvantages of preserving food.

- May lead to destruction of some nutrients.
- Food may change in taste/flavour and colour.
- May lead to food poisoning if poorly preserved.
- Some foods are rendered unsuitable to some groups of people.

Any $2 \times 2=4$ marks
(d) Process of making yeast mixtures.
(i) Fermentation.
(ii) Mixing.
(iii) First kneading.
(iv) First proving.
(v) Second kneading.
(vi) Shaping.
(vii) Second proving.
(viii) Baking.

Well arranged $8 \times \frac{1}{2}=4$ marks
23. (a) (i) Materials suitable for finishing floors in a living room.

- Ceramic tiles / PVC tiles.
- Cement.
- Wood.
- Linoleum.
- Thermoplastic.
- Marble.

Ar
(ii) Activities that take place in a living room.

- Reading / studying.
- Listening to music.
- Watching television.
- Taking meals.
- Entertaining visitors.
- Relaxing.
- Playing indoor games.
- Holding meetings.

Any $6 \times \frac{1}{2}=3$ marks
(b) Functions of each of the following in relation to pregnancy.
(i) Placenta

- Provision of oxygen to the foetus.
- Provision of nutrients to the foetus.
- Assists in excretion.
- Filters harmful substances.
(ii) Amniotic fluid
- Helps the foetus to move.
- Acts as a shock absorber.
- Lubricates body parts.
- Helps foetus lungs to develop.
- Keeps the foetus warm.
(c) Procedure of caring for a household duster after use.
- Shake $\frac{\frac{1}{2}}{2}$ outside after use/remove any unwanted material.
- Soak $\frac{1}{2}$ in cold water.
- Wash $\frac{1}{2}$ thoroughly in warm $\frac{1}{2}$ soapy water.
- Rinse $\frac{1}{2}$ in warm water $\frac{1}{2}$ and finally in cold $\frac{1}{2}$ water to refreshen $\left(\frac{1}{2}\right)$ the fabric.
- Dry in the open $\frac{1}{2}$ air.
- Store $\frac{1}{2}$ in a dry well ventilated $\frac{1}{2}$ place.
$12 \times \frac{1}{2}=6$ marks
(d) Ways of enhancing personal health.
- Eat a balanced diet.
- Get adequate sleep and rest.
- Exercise regularly.
- Take plenty of water.
- Have regular medical check up.
- Maintain positive mental attitude.
- Well fitting clothes/shoes.

24. (a) Methods of softening temporary hard water for laundry work.

By:

- Boiling.
- Addition of commercial water softeners.
- Use of sodium carbonate.
- Adding slaked lime (calcium hydroxide).

Any $4 \times 1=4$ marks
(b) Points to observe when working hand stitches:

- Use correct size of needle and thread for the fabric.
- Use correct tension.
- Choose correct stitch for the intended purpose.
- Use colour of thread that matches that of fabric except when decorating.
- Use a thimble to push needle.
- fasten on and off.
(c) Qualities of a well made patch on a pillow case.
- Should lie flat.
- Should be inconspicuous unless decorative.
- Should be of the correct weight in relation to the article.
- Should match in grain with the article.
- Stitching should be done close to the edge.
- The edges should be well tucked in

$$
4 \times 1=4 \text { marks }
$$

(d) Properties of linen that make it suitable for bedsheets.

- Is a good conductor of heat so keeps the body cool when hot and warm when cold
- Is absorbent so it is comfortable.
- Is strong to withstand frequent laundering and strong detergents.
- Can withstand high temperature so it can be sterilized by boiling and ironing.
- Does not generate static electricity, so will not get dirty fast.
- Dyes easily making it possible to obtain variety in colours.
- Lustrous making it appealing to the eye.
