 $VO = \sqrt{576}$   
 $= 24 \text{ cm}$

(b) The angle between VA and ABCD is  $\alpha$   
 $\tan \alpha = \frac{24}{10}$   
 $\alpha = 67.38^\circ$   
 (9)

(c) The angle between the planes is  $\beta$   
 $\tan \beta = \frac{24}{8}$   
 $\beta = 71.57^\circ$   
 (5)

23 (a)  $c = an + \frac{b}{n}$   
 $135 = 2a + \frac{b}{2}$   
 $140 = 3a + \frac{b}{3}$   
 $270 = 4a + b$  (i)  
 $420 = 9a + b$  (ii)  
 $150 = 5a, a = 30$   
 Sub  $a = 30$  in (i),  
 $270 = 120 + b, b = 150$   
 $\therefore c = 30n + \frac{150}{n}$   
 (b)  $c = 30 \times 10 + \frac{150}{10}$   
 $= \text{Rs } 315$   
 (c)  $756 = 30n + \frac{150}{n}$   
 $5n^2 - 126n + 25 = 0$   
 $(5n-1)(n-25) = 0$   
 $n = \frac{1}{5}$  or  $n = 25$   
 $\therefore$  the number of items = 25
