- ✓ Andrew, Jane, David and Zablon had tea, sausages and bananas for breakfast. They took one sausage, two sausages, three sausages and one sausage respectively. In addition, they each took a cup of tea and two bananas. Tea, sausages and bananas cost Ksh. 10, 15, and 5 respectively.
 - a) Construct a worksheet showing the above information. Save it as exams. (10 marks)
 - b) State the expression you would use:
 - i. To obtain the total expenditure by David. (5 marks)
 - ii. To obtain the total number of sausages taken. (3 marks)
 - iii. To indicate the person who had the least expenditure. (3 marks)
 - c) Explain the procedure for showing only the persons who bought >= 2 sausages. (4 marks)
