Paper 2

Biology – (Theory)

June 2023 – 2 hours

Name..... Index Number.....

Candidate's Signature..... Date.....

243

Instructions to Candidates

- (a) Write your name and index number in the spaces provided above.
- (b) Sign and write the date of examination in the spaces provided above.
- (c) This paper consists of **two** sections: **A** and **B**.
- (d) Answer **all** the questions in sections **A** and **B** in the spaces provided.
- (e) In section **B** answer question **6 (compulsory)** and either question **7** or **8** in the spaces provided after question **8**.
- (f) Non-programmable silent electronic calculators may be used.
- (g) **This paper consists of 9 printed pages.**
- (h) **Candidates should check the question paper to ascertain that all the pages are printed as indicated and that no questions are missing.**
- (i) **Candidates should answer the questions in English.**

For Examiner's Use Only

Section	Questions	Maximum Score	Candidate's Score
A	1	9	
	2	8	
	3	7	
	4	8	
	5	8	
B	6	20	
	7	20	
	8	20	
Total Score		80

Turn Over

1. The diagram below represents a part of thoracic region of a human being;

(a) Name the structures labeled **K** and **L** (2mks)

K.....

L.....

(b) How is structure R bring about inhalation (4mks)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(c) Give the scientific name of the organism that causes whooping cough (1mk)

.....

(d) Name a vertebra that articulates with the ribs to the back of the chest region? (1mk)

.....

2. The diagram below shows the vertical section of a female reproductive system

(a) Name the parts labeled **A** and **B** (2mks)

A.....

B.....

(b) Name the gonadotrophic hormone that affects the part labeled A (1mk)

.....

(c) (i) State a hormone(s) produced by each of the following structures in a female (2mks)

Ovary.....

Placenta

(ii) State **one** effect of each of the above hormones on uterine wall (2mks)

.....

.....

(d) Name a sub-division in the kingdom plantae that exhibit double fertilization (1mk)

.....

3. (a) Define the following terms as used in animal nutrition

(i) Dentition (1mk)

.....

(ii) Homodont and heterodont teeth (2mks)

.....

.....

(b) State **two** functions of ileum (2mks)

.....

.....

(c) Explain the importance of the following in the process of photosynthesis; (2mks)

(i) Chlorophyll

.....

.....

(ii) Light

.....

.....

(d) State **one** use of Potassium in (K^+) ion the body (1mk)

.....

4. A man who suffers from Haemophilia which is a sex linked gene; marries a woman who is normal for the condition. However, one of their daughters Jane turns to be haemophiliac. Taking 'H' for normal trait and 'h' for haemophilia

(a) State the genotypes of the parents (2mks)

.....
.....

(b) (i) Work out the genotypes of the offspring show your work (4mks)

.....
.....
.....
.....
.....
.....
.....
.....
.....

(ii) State the genotype of Jane (1mk)

.....
.....

(c) What is polyploidy (1mk)

.....
.....

5. The diagram below represents a longitudinal section through the human eye

(a) Name the parts labeled K and L (2mks)

K.....

L.....

(b) A person in totally dark room switches on light. Describe the changes that will occur to structure N (3mks)

.....

.....

.....

.....

.....

(c) How does the human eye obtain nutrients? (3mks)

.....

.....

.....

.....

.....

.....

SECTION B (40 MKS)

Answer question 6 (Compulsory) and either question 7 or 8 in the spaces provide after question 8

6. The glucose level in $\text{mg}/100\text{cm}^3$ of blood was determined in two persons Y and Z. Both had stayed for 6 hours without taking food. They were on equal amount of glucose at the start of the experiment. The amount of glucose in their blood was determined at intervals. The results are as shown in the table below:

Time (Mins)	Glucose level in Y in $\text{mg}/100\text{cm}^3$ of blood	Glucose level in Z in $\text{mg}/100\text{cm}^3$ of blood
0	85	78
20	105	110
30	116	130
45	130	170
60	100	195
80	93	190
100	90	140
120	90	130
140	88	120

(a) On the same graph and on the same axis, plot a graph of glucose level in blood against time (7mks)

(b) What was the concentration of glucose in blood of person Y and Z at 50th minute? (2mks)

Person **Y**

.....

Person **Z**

.....

(c) Account for the level of glucose for a person Y

(i) During the first 45 minutes (2mks)

.....

.....

.....

.....
